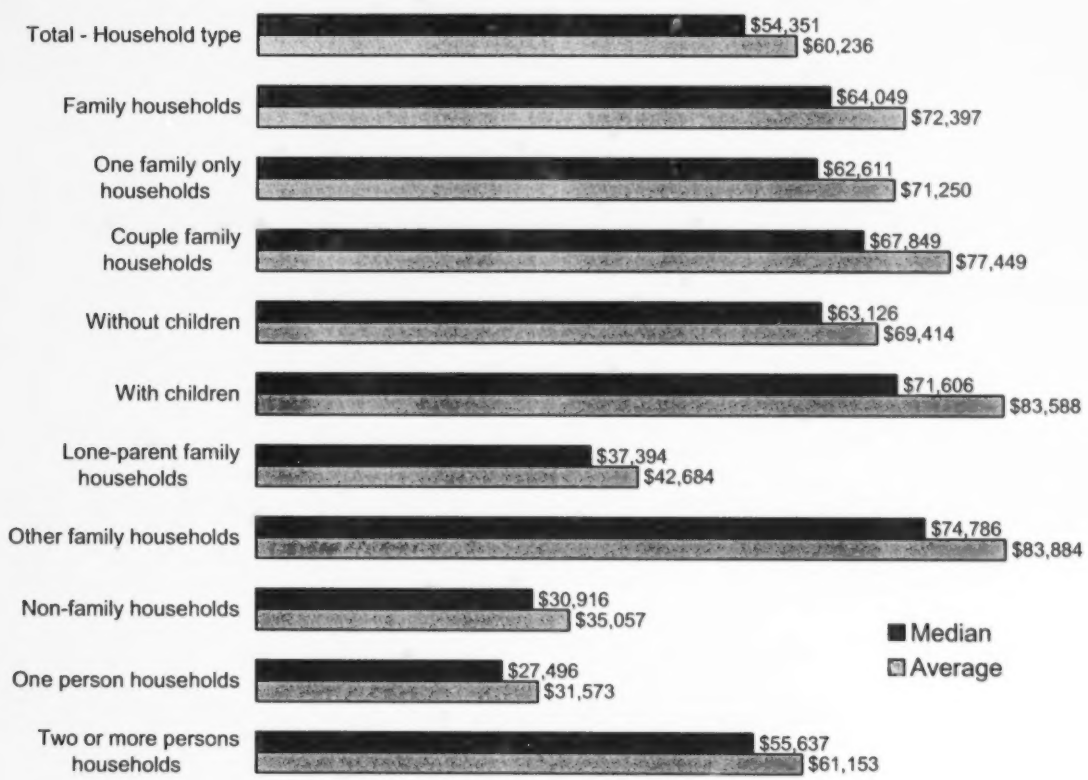
Average and Median Household Income by Household Type, Yukon, 2000



Notes

Census Family: Refers to a now-married couple (with or without never-married sons and/or daughters of either of both spouses), a couple living common-law (with or without never-married sons and/or daughters of either or both partners) or a lone parent of any marital status, with at least one never-married son or daughter living in the same dwelling.

Household: Refers to a person or group of persons (other than foreign residents), who occupy the same dwelling and do not have a usual place of residence elsewhere in Canada. It may consist of a family group (census family) with or without other non-family persons, of two or more families sharing the same dwelling, of a group of unrelated persons, or of one person living alone. Household members who are temporarily absent on Census Day (e.g. temporarily residents elsewhere) are considered as part of their usual household. For census purposes, every person is a member of one and only one household. Unless otherwise specified, all data in household reports are for private households only.

Other family households: Refers to one-family households with additional non-family persons and to multiple-family households, with or without non-family persons.
